

THE LIBRARY
OF THE
UNIVERSITY OF ILLINOIS

FORTY-SIXTH
ANNUAL ANNOUNCEMENT

Medical Department Building, Cor. Eighth and Chestnut Streets.

MEDICAL DEPARTMENT
OF THE
UNIVERSITY OF LOUISVILLE

SESSION OF 1882-83

COLLEGE CALENDAR, 1882-83

1882

September 4th, the Preliminary Course begins.
October 2d, Monday, Regular Session begins.
November, Thanksgiving-day holiday.
December 23d, 24th, 25th, 26th, Christmas holidays.

1883

February 17th, Saturday, Examinations for the Degree begin.
March 1st, Commencement.
March 5th, Monday, Spring Term begins.
June 1st, Spring Term ends.

BOARD OF TRUSTEES.

HON. ISAAC CALDWELL, PRESIDENT,
JAMES TRABUE, ESQ., TREASURER,
JOHN B. SMITH, ESQ.
R. J. ELLIOTT, ESQ.
D. SPALDING, ESQ.
HON. J. F. BULLITT,

PROF. J. L. SMITH, M.D.
CAPT. W. C. HITE,
JAMES C. GILBERT, ESQ.
JAMES A. LEECH, ESQ.
G. W. GRIFFITHS, M.D.

PROF. JAMES S. PIRTLE, SECRETARY.

MEDICAL FACULTY.

J. M. BODINE, M.D., DEAN,
Professor of Anatomy and Diseases of the Eye
and Ear.

JAMES W. HOLLAND, A.M., M.D.
Professor of Pathology, Clinical Medicine, and Dis-
eases of the Nervous System.

LUNSFORD P. YANDELL, M.D.
Professor of Principles and Practice of Medicine and
Clinical Medicine.

DAVID W. YANDELL, M.D.
Professor of Surgery and Clinical Surgery.

E. R. PALMER, M.D.
Professor of Physiology and Clinical Diseases of
the Chest.

THEOPHILUS PARVIN, M.D., LL.D.
Professor of Obstetrics and Medical and Surgical
Diseases of Women.

T. S. BELL, M.D.
Professor of State Medicine and Sanitary Science.

W. O. ROBERTS, M.D.
Prof. of Surgical Pathology and Operative Surgery.

JOHN A. OCTERLONY, A.M., M.D.
Professor of Materia Medica, Therapeutics, and Clinical Medicine.

H. A. COTTELL, M.D.
Lecturer on Medical Chemistry.

W. CHEATHAM, M.D.
Clinical Lecturer on Diseases of Eye, Ear, and Throat.

L. S. McMURTRY, A.M., M.D. AND R. B. GILBERT, M.D.
Demonstrators of Anatomy.

SPECIAL DEMONSTRATORS.

H. A. COTTELL, M.D.
Demonstrator of Microscopy.

W. CHEATHAM, M.D.
Demonstrator of Ophthalmoscopy, Laryngoscopy,
and Otoscopy.

B. BUCKLE, M.D.
Demonstrator of Operative Midwifery.

L. S. McMURTRY, A.M., M.D.
Demonstrator of Surgical Dressings.

ISAAC DAVID, JANITOR.
Residence Cor. Ninth and Chestnut.

ANNUAL ANNOUNCEMENT.

Notwithstanding the loss of two of the old Faculty during the vacation, the Forty-fifth Annual Session of this Department was successful to a degree extremely gratifying to its Trustees, Faculty, and friends.

The city of Louisville in 1837 donated a square of ground containing four acres, and appropriated fifty thousand dollars to erect and equip an edifice suited to the requirements of a first-class Medical College. This property, now lying in the heart of the city, has advanced largely in value. The Lecture-rooms, Cabinets, Library, Laboratories, and Dissecting-rooms are furnished with every thing necessary for convenience and instruction, while its Museum, already one of the finest in America, is being constantly added to from various sources. In apparatus, models, drawings, preparations, and specimens for illustration by the various chairs, the institution possesses every requisite for thorough medical teaching; and in view of its perfect equipment, the Board feels safe in assuring its friends that it never before presented stronger claims to the confidence and support of the medical profession.

CLINICAL MEDICINE AND SURGERY.

It is the determination alike of the Faculty and Trustees to secure to students that kind of information which will be most useful to them in active professional life, and it will be seen that no effort has been spared to make the University essentially a *practical* and *demonstrative* school.

The UNIVERSITY DISPENSARY, which is the property of the Faculty, affords great facilities to students. The building is upon the University grounds, and is open to patients and students throughout the year. It is the oldest institution of the kind in Louisville. It has obtained the confidence of the sick poor of the city, and its clinics are daily crowded with patients illustrating all varieties of disease. The advantages accruing to the University students from this source are among the chief attractions of the institution, giving them opportunities for attending cases and witnessing disease in every phase. The DISPENSARY furnishes material for DAILY COLLEGE CLINICS from the following chairs: Clinical Medicine, Clinical Surgery, Diseases of Women, Diseases of Children, Diseases of the Heart and Lungs, Diseases of the Eye and Ear and Throat, Diseases of the Skin, and Diseases of the Nervous System.

In addition to the daily College Clinics mentioned, two Medical and two Surgical Clinics will be held weekly in the commodious amphitheater of the CITY HOSPITAL.

The Professors of Clinical Medicine and Clinical Surgery will lecture in the Hospital during the session. In addition to the above the abundant clinical material of SS. MARY AND ELIZABETH HOSPITAL is at the command of the University Faculty.

FREQUENT EXAMINATIONS.

Universal experience has demonstrated the paramount importance of this mode of instruction as supplemental to lectures, and the Faculty has made a special provision for it. The wisdom of this action has been abundantly shown. The Faculty therefore devote additional hours for the purpose of a general "quiz" to be conducted by themselves.

PRACTICAL ANATOMY.

The city of Louisville offers abundant opportunity for the study of practical Anatomy. Material is plentiful and will be furnished at a moderate price. The Dissecting-room of the University is admirably adapted for its purposes, being extraordinarily large, well ventilated and lighted, and furnished with all the conveniences for cleanliness and health. It is open daily, Sundays and Saturdays excepted, from eight to half past ten o'clock, P.M. The demonstrators give personal superintendence at the tables, and render instruction by *separate demonstrations and frequent examinations*.

In view of the importance of this branch of medical instruction, the authorities of the University urge all students to take the ticket in Practical Anatomy. The wisdom of this course will be conceded when it is considered that this foundation of all medical science must almost necessarily be obtained in organized dissecting-rooms, and that the custom of requiring but one course of dissection is a tradition of the past which arose simply from the difficulty in obtaining material.

CHANGES IN AND ADDITIONS TO THE FACULTY.

STATE MEDICINE AND SANITARY SCIENCE.—It has always been an object of the University to instruct in the art of preserving the health of communities. By establishing a chair with the above title, and calling to it PROF. T. S. BELL, long Professor of Science and Practice of Medicine, whose sanitary teachings have been accepted in Europe and America for many years, it is felt that ample provision has been made for the growing demand in this field.

PROF. L. P. YANDELL, who for many years filled most acceptably the Chair of Materia Medica and Therapeutics, and more recently that of Clinical Medicine and Diseases of Children and Dermatology, has been transferred to the Chair of the Principles and Practice of Medicine and Clinical Medicine. PROF. YANDELL'S well-earned distinction as a teacher and writer in this department of medicine is so well established that his election to this chair will meet with universal approbation among the friends of the University. His familiarity with the most recent advances in medicine, together with his ripe experience as a practitioner, guarantee most thorough and practical instruction in this important field of study.

PROF. PARVIN, who was selected to fill the chair made vacant by the death of PROF. CROWE, having recently resigned the Chair of Obstetrics and Diseases of Women which he held in the medical school in Indianapolis, will now be able to give his entire time to teaching in the University.

PROF. HOLLAND, who for years past has taught Materia Medica, Medical Chemistry, and Diseases of the Nervous System, and who, as the editor of the Louisville Medical News, is so well known as a writer on medicine, has been transferred to the

Chair of Pathology, Clinical Medicine, and Diseases of the Nervous System. It is confidently predicted that in this new field he will add still further to the value of the instruction to be obtained in the institution.

It will be remembered that on the death of PROF. COWLING the two surgical chairs in the institution were merged, and PROF. D. W. YANDELL filled the two; DR. W. O. ROBERTS being assigned as adjunct to the chair. The Trustees are glad to announce that such was the manner in which DR. ROBERTS discharged the duties of the place that the Faculty unanimously asked that the Chair of Surgical Pathology and Operative Surgery be restored, and DR. ROBERTS was appointed to fill it.

The appointment of DR. J. A. OCTERLONY to the Chair of Materia Medica and Therapeutics and Clinical Medicine the Trustees feel assured will be received with favor by all friends of the University. DR. OCTERLONY is so well known as a writer and has been for so long identified with medical teaching in this city and has won such distinction in the Chair of the Theory and Practice of Medicine in the Kentucky School of Medicine, of which institution he was recently the Dean, that the wisdom of adding his name to the Faculty of the University can not be doubted.

Medical Chemistry will be taught by DR. H. A. COTTELL, principally by laboratory manipulations. This course deals with poisons and their antidotes, and the relations of chemistry to physiology and pathology. The analysis of urine for diagnostic purposes is thoroughly taught, and experimental illustration used whenever practicable. The science as made useful to the practitioner will be the subject of DR. COTTELL's lectures. A knowledge of occult and mathematical chemistry will not be required of graduates.

DR. COTTELL, Demonstrator of Anatomy, having been assigned by the Faculty to the lectureship on chemistry, DR. L. S. MCMURTRY, formerly Demonstrator of Anatomy in the University of Louisiana, recently Professor of Anatomy in the Kentucky School of Medicine, has been appointed Demonstrator of Anatomy, and in conjunction with DR. GILBERT will have charge of the anatomical rooms. Abundant material will be provided and every facility offered to students to ground themselves in this most important portion of their medical education.

The Trustees call attention to the fact that in the several changes made in the teaching corps of the University a decided advance has been made in the direction of clinical and demonstrative teaching. No institution in America offers greater advantages in clinical medicine and surgery or demonstrative teaching of all the studies embraced in the curriculum.

THE FORTY-SIXTH ANNUAL SESSION.

The Forty-sixth Regular Annual Session will commence on October 2, 1882, and will continue until March 1, 1883. Previous to this there will be a preliminary course of lectures free to all students, opening Friday, September 4th, and lasting until the beginning of the regular term. This course will consist of a series of lectures on the following subjects:

<i>Eye and Ear,</i>	By Prof. BODINE.
<i>Diseases of the Skin,</i>	Prof. L. P. YANDELL.
<i>Reproduction,</i>	Prof. PALMER.
<i>The Methods of Studying Disease,</i>	Prof. BELL.
<i>General Pathology,</i>	Prof. HOLLAND.

<i>Diseases of the Genito-Urinary Organs,</i>	By Prof. D. W. YANDELL.
<i>Diseases of the Rectum,</i>	Prof. ROBERTS.
<i>Diseases of Women,</i>	Prof. PARVIN.
<i>Eruptive Fevers,</i>	Prof. OCTERLONY.

DAILY CLINICS will be held.

FEES.

The fee for admission to the entire Course of Lectures is SEVENTY-FIVE DOLLARS, payable, as are all the fees, *invariably in advance*. The Matriculation Ticket is FIVE DOLLARS, and gives the student the use of the extensive Library of the institution during the winter. The Graduation fee is THIRTY DOLLARS. The fee for admission to the Dissecting-room and for instruction by the Demonstrator of Anatomy is TEN DOLLARS. The fee for the Hospital Ticket (required by the city) is FIVE DOLLARS.

SPECIAL AND OPTIONAL MANIPULATIVE COURSES.

The continued success of the practical exercises in Laboratories especially fitted with Beck's microscopes, sets of chemical reagents, manikins, ophthalmoscopes, laryngoscopes, etc., etc. has confirmed the wisdom of the Faculty in instituting these courses.

Every facility and all needful apparatus are furnished to make these teachings of permanent value to the student.

MICROSCOPY.

A large well-appointed and well-lighted room, furnished with tables and forty sets of chemical reagents and apparatus is set apart for the use of classes in this course.

The class is taken in sections of a manageable size, and each member is taught the handwork of Microscopy on actual specimens provided for experiment. Each person is taught how to use the microscope in medical investigation. A full collection of Beck's microscopes, mounting apparatus, with healthy and diseased specimens, mounted and unmounted, are at the service of students, who are expected to make use of them under the immediate direction of the Demonstrator. Living phenomena are exhibited on frogs, fishes, etc.

OPHTHALMOSCOPY, LARYNGOSCOPY, AND OTOSCOPY.

A commodious room, with blackened walls, partitioned into small compartments, and lighted by adjustable Argand burners, is for the use of classes in this department. Patients from the clinic and the healthy human eye are the materials for study. Instruments are put into the students hands and every detail of their application practically shown on the living subject.

OPERATIVE MIDWIFERY:

Bornes's ingenious manikin, imported at considerable cost, dissectible and capable of adequately showing all the principal matters for obstetric study, is employed by the Demonstrator. He teaches each student, by means of a real fetus, the positions, presentations, and the management of natural and unnatural labor. Operations with the forceps and other instruments are performed by every member of the class *deliberately*, and this important field of medical knowledge thoroughly worked over.

SURGICAL DRESSINGS.

This room is supplied with all needed models and appliances for demonstrating surgical dressings. Bandages, splints, and plastic materials are supplied, while the student is not only instructed in but urged to apply every surgical dressing in established use.

DEMONSTRATORS.

H. A. COTTELL, M.D., *Demonstrator of Microscopy.*

W. CHEATHAM, M.D., *Demonstrator of Ophthalmoscopy, Laryngoscopy, and Otoscopy.*

B. BUCKLE, M.D., *Demonstrator of Operative Midwifery.*

L. S. MCMURTRY, A.M., M.D., *Demonstrator of Surgical Dressings.*

The fee for all these departments is FIFTEEN DOLLARS. The fee for a single department is FIVE DOLLARS:

It is especially recommended that first-course students should take Microscopy, for which a fee of FIVE DOLLARS will be charged; and second-course students the three other courses, for which a fee of TEN DOLLARS will be charged.

These special courses are optional.

It is urged upon all who seek to train their senses to the requisite degree of skill to make good diagnosticians and operators, that at least one course of each of the manipulative branches be taken before applying for the degree.

REQUISITES FOR GRADUATION.

1. The candidate for the degree of Doctor of Medicine must have attained the age of twenty-one years, and sustained a good moral character.

2. He must have studied medicine not less than three years, "or his three years' study shall expire at a date not later than three months after the close of the final examination."—*Articles of Confederation American Medical College Association.*

3. He must have attended two complete Courses of Lectures, the last of which shall have been in this institution, have taken the ticket of the Demonstrator of Anatomy one session, and have attended one course of Clinical Instruction in the Louisville Marine Hospital, or some other institution approved by the Faculty.

4. Students who have read the requisite time and attended a full course of lectures in a recognized medical school are admitted to examination in this school after attendance upon one complete course.

The candidate, at the time of applying to the Dean for admission, must exhibit his tickets as proof of compliance with the above rules. He must have paid in full all college-dues. The graduation-fee must be paid to the Dean by the 1st day of February, and will be returned in the event of the candidate's withdrawal or rejection. The presentation of a Thesis is not required.

The examinations for the degree are on all the branches taught in this College.

HONORS AND PRIZES.

As the experience of this College has been that the system of conferring prizes for excellence in special branches tends to the concentration of the student's mind upon a single department to the neglect of others equally important, it has therefore

been determined that the honors and prizes of the University shall be given for general excellence only.

To each of the ten men standing highest in the final examination a certificate of honor will be awarded. To the student standing at the head of this list the "Yandell"* gold medal for first honor will be given; to the one standing next a gold medal for second honor; and to the one standing third a gold medal for third honor will be awarded.

PRIZES FOR FIRST-COURSE STUDENTS.

In order to stimulate students who are not of the graduating class to study, especially in the fundamental branches of Medicine, a special examination will be held near the end of the term on the subjects of Anatomy, Physiology, Materia Medica, and Chemistry, and to each of the three showing the greatest proficiency prizes will be awarded as follows:

To one, a case of Instruments, by Arthur Peter & Co., wholesale druggists, Louisville, Ky.

To one, a copy of Gross's or Erichsen's System of Surgery, by John P. Morton & Co., booksellers and publishers, of Louisville, Ky.

To one, an improved Harris Electro-Medical Nine-current Faradic Battery, to be given by G. T. Craven & Co., general agents, 536 Third Street, Louisville, Ky.

This examination of first-course students is voluntary.

All honors and prizes will be announced and awarded by the President at the Annual Commencement.

AWARDS OF HONORS AND PRIZES FOR SESSION 1881-82.

In accordance with the Circular for the Forty-fifth Annual Session, the President announced the awards made by the Faculty as follows:

ROLL OF HONOR.

James Morrison Ray, M.D., of Kentucky.

Andrew W. Chapman, M.D., of Missouri.

Francis M. Wells, M.D., of Indiana.

Richard H. Ellis, M.D., of Missouri.

John T. O'Barr, M.D., of Texas.

Stephen T. Turner, M.D., of Texas.

Hamilton Stillson, M.D., of Indiana.

Charles W. Ladd, M.D., of Indiana.

John S. Lankford, M.D., of Texas.

Cornelius Breen, M.D., of Ireland.

Each of the above-named gentlemen received a certificate of honor.

The Yandell gold medal, named in honor of the late Dr. L. P. Yandell, sr., was awarded, for the best class-standing, to J. M. Ray, M.D., of Kentucky. The second gold medal, for second place in class-standing, was awarded to A. W. Chapman, M.D., of Missouri; and the third to F. M. Wells, M.D., of Indiana.

THE UNDERGRADUATES' CONTEST.

To John Q. Taylor, of Kentucky, was awarded the first prize, a case of Instruments, offered by Arthur Peter & Co.

*This prize is named in honor of the late Prof. L. P. Yandell, who was the last of the original Faculty of this institution.

To Travis Carroll, of Kentucky, was awarded the second prize, a copy of Erichsen's Surgery, offered by John P. Morton & Co.

To Dulaney L. Washburne, of Kentucky, was awarded the third prize, a case of instruments, offered by Simon N. Jones.

TEXT-BOOKS.

The following works are recommended by the Faculty to students as useful companions to the different courses of lectures :

On Sanitary Science—Parent-Duchatelet, Parkes, Guy.

On Surgery—Gross, Erichsen.

On Chemistry—Attfeld, Tyson's Examination of Urine.

On Anatomy—Gray, Wilson.

On Materia Medica and Therapeutics—Ringer, Waring, United States and National Dispensaries.

On Clinical Medicine—Da Costa on Medical Diagnosis.

On Physiology—Flint, jr., Dalton, Foster.

On the Science and Practice of Medicine—Flint, Bristowe.

On Obstetrics—Parvin, Playfair, Leishman, Cazeaux.

On Diseases of Women—Thomas, Hewitt, Barnes, Emmet.

On Physical Diagnosis—Loomis, Bruen.

On Operative Surgery—Bell, Heath.

On Surgical Pathology—Paget.

SPRING COURSE, 1883.

The Spring Session for 1883 will commence on the 5th day of March and terminate on the 1st of June.

It includes Clinical teaching and Pharmaceutical work in the Dispensary, systematic recitations from Text-books by a corps of examiners who have the use of the Museum for illustration, personal manipulations in Operative Surgery, Surgical Dressings, Chemistry, Histology, Ophthalmoscopy, Laryngoscopy, and Otoscopy, under the supervision of Demonstrators.

CORPS OF INSTRUCTORS.

<i>On Diseases of the Eye and Ear,</i>	Prof. BODINE.
<i>On Venereal Diseases and Diseases of the Skin,</i>	Prof. L. P. YANDELL.
<i>On Diseases of the Chest,</i>	Prof. PALMER.
<i>On Nervous Diseases,</i>	Prof. HOLLAND.
<i>On Clinical Surgery,</i>	Prof. D. W. YANDELL.
<i>On Surgery and Surgical Dressings,</i>	Prof. W. O. ROBERTS.
<i>On Clinical Medicine,</i>	Prof. JNO. A. OCTERLONY.
<i>On Medical Chemistry and Microscopy,</i>	Dr. H. A. COTTELL.
<i>On Diseases of Children,</i>	Dr. R. B. GILBERT.
<i>On Obstetrics and Diseases of Women,</i>	Dr. B. BUCKLE.
<i>On Diseases of the Eye, Ear, and Throat,</i>	Dr. W. CHEATHAM.
<i>On Materia Medica and Practice of Medicine,</i>	Dr. W. B. DOHERTY.
<i>On Anatomy,</i>	Dr. L. S. MCMURTRY.

The Spring Course is designed to be supplementary to the regular Winter Course. Attendance upon it is voluntary, and does not count as a session.

The fee for the full course is TWENTY-FIVE DOLLARS.

Advanced students will be given obstetrical cases and cases in outdoor practice.

POST-GRADUATE COURSE.

The Faculty has organized a Post-graduate Course, which will follow immediately upon the winter session and continue six weeks. Special instruction will be offered to practitioners in various departments of medicine and surgery. The attention of physicians is especially called to this feature in the University plan of teaching. For further information address the Dean.

ISAAC CALDWELL, *President of the Board.*

ALUMNI ASSOCIATION.

An association of the Alumni of this institution was organized in the hall of the University building on the 25th of last February, when the following officers were elected: Dr. Coleman Rogers, of Louisville, President; Dr. James Rodman, of Hopkinsville, Ky., First Vice-president; Dr. E. W. King, of New Albany, Ind., Second Vice-president; Dr. E. P. Easley, of New Albany, Ind., Secretary and Treasurer. Drs. W. Cheatham, Preston B. Scott, and Prof. E. R. Palmer were appointed a committee to arrange for the next meeting of the society, which will be held in the University building on the evening preceding the annual commencement of the medical department. The annual address will be delivered by Dr. Nath. Bozeman, of New York city, class of 1848. The objects of the society are the cultivation of mutual good feeling among its members, the strengthening of the ties which naturally bind them to their *Alma Mater*, and for advancing scientific medicine. The initiation fee is one dollar and the annual due one dollar; alumni in good standing are eligible to membership; alumni are requested to send their names, date of graduation, and address to the Secretary, E. P. Easley, M.D., New Albany, Ind.

COLEMAN ROGERS, M.D., *President.*

Catalogue of Class---Session of 1881-'82.

NAME.	STATE.	PRECEPTOR.
AMIS, JOHN C.	Kentucky,	Dr. J. N. Baughman.
ALEXANDER, CHARLES M.	Kentucky,	Dr. J. R. Schooling.
